AI Business Value Scorecard

Overview

This scorecard helps assess the feasibility, impact, and risks of AI initiatives. Use it to systematically evaluate an AI use case and determine its priority for implementation.

How to Use This Scorecard

1. Review your AI use case.

2. Score each category from 1 (Low) to 5 (High).

3. Total the scores to determine priority.

4. Use your insights to justify your AI implementation decision.

Category	Score (1-5)	Justification
Business Impact		
Technical Feasibility		
Cost & Resource Needs		
Regulatory & Ethical Risks		
Implementation Complexity		
Strategic Alignment		
Scalability Potential		
TOTAL SCORE		

Decision & Next Steps

High Priority (25-35 points): Strong candidate for AI investment.

Medium Priority (15-24 points): Viable but may need refinements.

Low Priority (Below 15 points): Likely not worth pursuing at this time.

Next Actions:

- Identify required improvements or data needs.

- Develop a business case for stakeholders.

- Align AI initiatives with long-term strategy.
